DETAILED ACTION

Allowable Subject Matter

1. Claims 1-15 are allowed.
2. The following is an examiner's statement of reasons for allowance: The closest prior art is Litvak (US 5,499,733). Litvak teaches a process of measure light intensities for different wavelengths of light to determine an etch endpoint (col 8, ln 15-30). Litvak also teaches the process can be in processes where a layer is not intended to be completely removed (col 11 ,ln 5-20). Litvak estimated an etch endpoint by counting the number of cycles of varying signal output. Litvak does not teach or suggest the detecting a first intensity maximum reflected from the first layer at a first wavelength followed by a next detectable maximum at a second wavelength detected before all of the first layer is removed to estimate the main etch endpoint and without etching the underlying layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
